THREAT MODELING

The Easy Way!

CYBER SAVVY

Video #2

Threat Modeling

QUESTION #1

What online services do I use that would cause me harm if compromised?

QUESTION #2

What is the damage that would happen if it was compromised?

QUESTION #3

How could it be compromised by someone?

QUESTION #4

What can I do to protect it?

QUESTION #5

How compromised am I right now?

Everyone's Threat Model is unique to them at that moment. It should be reviewed when circumstances change or a year later.
